

Looking for Patterns

Repeating Shapes

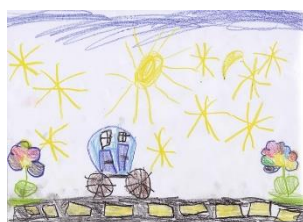

This is can a detective challenge! How many repeating shapes can you find?

Below are a few examples:

Now you can made repeating patterns with your child.

You can draw repeating patterns such as a great repeating footpath:

Make patterns with objects, e.g. with beads or blocks:

Stick stickers or shapes of paper to card to make patterns:

Being able to see patterns helps your child to make relationships from one thing to the next. This will help with predictions in Numeracy.

When making fun patterns, ask questions such as, 'What do you think will come next?'
