

Making Links

You will find pairs of nouns overleaf.

Nouns are things, or naming words.

They represent things in the world which are linked or connected in many different ways.

Being able to reason about how and why things belong together is an important thinking skill, and being able to put your thinking into words is a vital language skill.

Take a look at the pairs below. Name them and then say how they are the same.

If you like, you could talk about how they are different too.

Have fun!

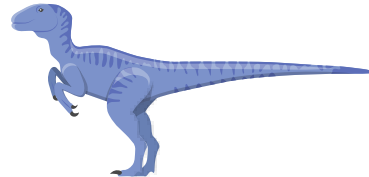

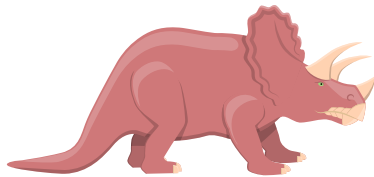

How are these 2 alike?

What is the connection between these 2?

Say why these 2 go together.

What is the connection between these 2?

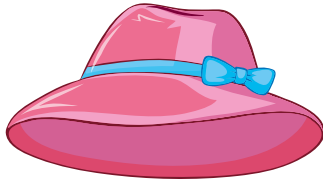

What do these have in common?

How are these the same?

How are these two similar?

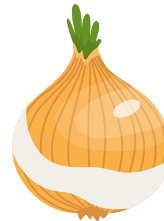

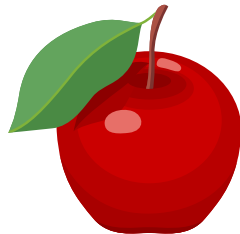

What do these have in common?
